Education

Bachelors Degree in Computer Science.
First Class Honours. 2021.
Federal University of
Agriculture Abeokuta, Nigeria.

National Diploma in Computer Science.
Distinction 2015.
Federal College of Animal Health and
Production Technology, Ibadan Nigeria.

Expertise

- Full Stack development
- Database management
- API development
- Technical documentation
- Project management
- Problem solving and Critical thinking
- Time management and Communication

Technical Skills

- **PHP Framework:** CodeIgniter 3, Laravel
- **Frontend Technologies:** React, Redux
- **Backend Technologies:** Java (Springboot), PHP
- **Database Management:** MySQL

Experience

Software Engineer - Hybrid

April 2022- Present

Payvantage Limited.

Ikeja, Lagos, Nigeria.

- Developed REST APIs using PHP (CodeIgniter 3 and Laravel) and Java (Springboot) to access and use data for the purpose of communication between programs.
- Created full-fledged web applications using PHP (CodeIgniter 3, Laravel), React.js, and Redux Toolkit to consume APIs and manage application states.
- Consumed Endpoints (APIs) and integrate on the User-End.
- Integrated third-party APIs from external applications into web platforms.
- Defined and maintained databases to deliver responsiveness to data client requests.
- Worked with team to deliver in-house solutions
- Provided guidance and support to new interns, including answering questions, reviewing work, and providing feedback on performance.

Frontend Developer - Remote

April - November 2024

Sawport Inc.

Dallas, Texas, United States.

- Developed responsive web pages using React.js and integrated APIs to enhance user interactions.
- Managed version control with GitHub, including pull requests and code reviews, to ensure code quality.
- Created documentation and release notes to enhance team and stakeholder communication.
- Conducted thorough testing to identify and resolve bugs, ensuring application reliability.

Backend Engineer - Remote

July 2022- August 2024

Nigeria Computer Society

Ikeja, Lagos, Nigeria.

- Formulated logical processes and workflows for a thrift collection system, applying them to API development.
- Originally developed REST APIs using PHP, then transformed them into Java Spring Boot to enhance program communication and data utilization.
- Integrated third-party APIs from external applications including Identity Pass.
- Documented APIs to facilitate seamless third-party integration and easy usage.
